

11. Februar 2010

Mini-Symposium
Physical Organic Chemistry
in Honour of Prof. Rolf Huisgen

Programme

- 15h00 Welcome
- 15h05 Prof. **Christoph Schalley**, Freie Universität Berlin
Programmed Supramolecules: Self-Sorting and Self-Assembly for the Construction of Multiply Threaded Pseudorotaxane Architectures
- 15h40 Prof. **Herbert Mayr**, Ludwig-Maximilians-Universität München
Nucleophilic Substitutions at Saturated Carbon Centers: Absolute Rate Constants for Lifting the Mechanistic Fog
- 16h30 Coffee Break
- 17h00 Prof. **Jörn Manz**, Freie Universität Berlin
Panta Rhei - Nuclear and Electronic Fluxes in Molecules, from H_2^+ to Pericyclic Reactions
- 17h35 Prof. **Kendall N. Houk**, University of California, Los Angeles
Transition States and Dynamics of Cycloadditions

Lecture Hall, Takustr. 3, 14195 Berlin-Dahlem

Prof. Dr. Hans-Ulrich Reißig
